Pod Collection

The workplace has changed and continue to evolve. Offices and commercial spaces are taking fresh approach to the typical work environment. It is less about dividing space and more about open free flowing interiors that are playful and collaborative, with a focus on expressing a sense of character and individuality.

Pod evolution has come a long way. Originally introduced to enhance and support breakout space, pods have become rooms in their own right, creating an area where creativity and innovation takes place. Having long been used as a place to hold meetings that require a level

of privacy, pods are now being used in a very different way, helping us in the way we choose to work.

We are witnessing a new wave of modern pod that breaks away from the typical typology, helping promote a more collaborative and healthier work environment. Making happier employees with less time absent from work. With society moving away from the tradition of the personal desk, our pods provide a designated shelter for staff to physically and intentionally carry out a task that requires some 'focus' space. Improving an individual's concentration, safety and efficiency in their space.

Qube

A versatile architectural space
designed for flexibility.

boss

Qube

Designed by Boss

The Qube pods are a modular high-performance acoustic room collection that create the ideal private meeting or office space. The design of the acoustic wall panels and ceiling is such that sound absorption is optimised whilst not compromising the lightweight aesthetic value.

Standard features include PIR controlled lighting and acoustic ceiling tiles for enhanced privacy with airflow options available. Qube is a cost effective meeting room for the collaborative workplace.
